

CERAMIC PASTE SPRAY

For long-lasting lubrication of highly-loaded sliding surfaces of all types as well as for bayonet, plug-in and screw joints, which are exposed to high temperatures and corrosive influences such as braking systems, pipe, flange and valve screws. For applications in the automotive, marine, construction and agricultural machinery sectors as well as industry and handicraft.

CHARACTERISTICS

- free of metal, no interference of sensors in braking systems
- allows easy removal, even after they have been in operation for a long time
- long-term resistance to water, salt water as well as to many acids and alkaline solutions
- metal-free lubrication, anti-corrosive
- 360° valve

TECHNICAL DATA

temperature resistance	to +1500°C
shelf life	36 months, store in a cool and dry place

INSTRUCTIONS FOR USE

Shake well before use. Remove coarse excess material with a wire brush and then thoroughly clean and degrease with PETEC brake cleaner (art. no. 70060). Apply an even coat of PETEC ceramic paste spray on the thread in question and spray the surfaces. Then assemble the parts as required.

Observe the safety and technical datasheet! (Download PETEC data sheets from www.petec.de)

CONTAINER SIZE

Item-No. 70650

500 ml spray
